SpiralVeyor® SV

A new generation of elevators

SpiralVeyor® in general

- Continuous elevator
- Space-saving design
- High throughput
- Patented roller design
- Tailor made

SpiralVeyor® SV

Food processing / packaging

Print finishing

Bottling & Canning

Postal / Distribution

Pharmaceutical industry

The introduction of the AmbaFlex SpiralVeyor® SV in the mid nineties sparked a revolution in material handling. Paired with a simple and robust design, the space-saving configuration provides an effective solution to the traditional issues associated with height differences. The lateral roller system patented by AmbaFlex is simple and reliable, and it renders controls and sensors superfluous. The continuous motion represents a solution for the exacting situations involved with unstable products and high production speeds. With its installed base of thousand machines world wide (including demanding multinational clients), the AmbaFlex SpiralVeyor® SV sets the standard for industry.

Distinguishing features:

- Only one drive needed for height differences up to 12 m.
- A choice of many belt types with or without high friction.
- Belt maintenance without using tools.
- Transports heavy items even if not positioned central on the belt.

Technical specifications:

- Material configurations: Mild steel, coated / high corrosion resistant / stainless steel wash down (100% stainless, no soft metals used).
- Elevation up or down (or reversible).

- Loads of up to 50 kg/m.
- Belt speeds of up to 90 m/min.
- Angle of incline 2.5° - 15°.
- CE certified and 100% intrinsic safety.

SpiralVeyor®	Belt width	Foot print
SV-200-1000	200 mm	1240 mm square
SV-400-1300	400 mm	1740 mm square
SV-600-1600	600 mm	2240 mm square

Specials on request

Alternative machines:

- For wider belt configurations we refer to the SpiralVeyor® SVX-EB.
- For double or triple parallel product streams see our SpiralVeyor® SVX-DL.
- For smaller belt width or mass flow application we refer to the SpiralVeyor® SVM.
